

Dear FCC,

I believe the Broadcast Flag is a very bad idea and goes against the very principles that this country was founded on. Freedom. Freedom of choice. Freedom to innovate. To make a ruling that would allow a small group of individuals the control to limit what the masses can do is just plain wrong. Such a ruling would not only limit free access to content, it would be harmful to future innovations.

Please do not allow the Television, Recording, and Movie industries to limit what kind of access we have to content. Doing so would force 98% of the consumers to be considered criminal to protect the media providers from the 2% that actually MAY be breaking a law.

Thank you,

Dale Noll
